

LUIS GUILLERMO BRACHO ORTEGA

Cybersecurity Engineer | IT Technician

+52 81 8083 7220 • guillermobracho02@gmail.com • Monterrey, Nuevo León, Mexico

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Engineer with 2+ years of hands-on experience securing enterprise IT infrastructure for a managed services provider. Demonstrated ability to own and deliver end-to-end infrastructure projects — from firewall and Active Directory deployments to endpoint protection and network segmentation — on time and within scope. Fluent in English (C1); skilled at translating technical complexity into clear documentation and cross-functional communication. Passionate about operational excellence, proactive threat mitigation, and continuous improvement of organizational security posture.

PROFESSIONAL EXPERIENCE

Cybersecurity Engineer | PCM

May 2025 – Present | Monterrey, Mexico

- Administered Active Directory (users, OUs, groups) and enforced GPO security policies — including password controls and software restrictions — across a multi-site corporate environment, reducing policy violations by standardizing access controls.
- Deployed and managed Trend Micro Antivirus across all endpoints: centralized policy configuration, whitelisting, and incident response, achieving consistent endpoint protection coverage.
- Configured and maintained corporate firewalls with filtering rules, NAT, and network segmentation; monitored anomalous traffic and responded to entry-level security incidents, improving overall security posture.
- Designed and implemented network topologies in Cisco Packet Tracer using IPSec-secured WAN links; configured voice/data VLANs and dynamic DHCP to ensure availability and segmentation compliance.
- Managed VMware virtualization environments: VM provisioning, snapshots, and infrastructure maintenance to support business continuity.
- Deployed and configured wireless access points (SSID, segmentation, user access controls) and IP camera systems with secure network integration.
- Created and maintained technical documentation — configurations, network diagrams, operational procedures, and change logs — ensuring continuity across the IT team.

Network Security Analyst | PCM

Feb 2024 – Apr 2025 | Monterrey, Mexico

- Performed continuous network monitoring and vulnerability identification, proactively mitigating threats before escalation.
- Implemented security measures and developed corporate security policies to strengthen the overall IT environment.
- Installed and configured IP cameras, access points, and physical access control systems, integrating them securely into the corporate network.

TECHNICAL SKILLS

Network & Security: Active Directory & GPO · Firewall Administration · VLAN Segmentation · IPSec VPN · DHCP · Vulnerability Assessment

Tools & Platforms: Trend Micro Antivirus · VMware · Cisco Packet Tracer · Splunk · IP Camera Systems · Access Control Systems

Soft Skills: Leadership · Problem-Solving · Critical Thinking · Project Management · Technical Documentation

EDUCATION

B.S. Systems Engineering — Universidad Autónoma de Nuevo León (UANL)

2019 – 2025

GPA: 3.36 / 4.0 (84/100 average)

CERTIFICATIONS

Cisco CCNA: Switching, Routing, and Wireless Essentials

LANGUAGES

Spanish — Native **English** — Advanced / C1
